

I am a licensed electronics technician (FCC General Radiotelephone Lic. #PG14-2833) and an Amateur Radio Operator (W7NRJ). Broadband over Power Lines (BPL) has, in my professional opinion, the potential to disrupt or make unuseable the airwave frequencies between approximately 2 and 80 megahertz. Many important entities use these frequencies to bring entertainment, information and important services to the general citizenry of the United States of America. For these reasons, I respectfully urge the Federal Communications Commission to disallow implementation of BPL.
